PETITION TO STOP THE COMMERCIAL RELEASE OF GM WHEAT

By signing the petition below, I call on elected officials, political candidates, and my state's Department of Agriculture, Universities and Colleges to pursue the following objectives:

To not allow the growing of genetically modified wheat until it can be proven:

- ➡ There is a demonstrated demand for genetically modified wheat by the buyers of wheat including the domestic and foreign markets.
- ➡ There will be no disruption of the market for organic and non-genetically modified wheat.
- ➡ That shipping and storage systems will be able to keep genetically modified grains separate from other varieties.
- ➡ The growing of transgenic crops will not cause the genetic contamination of neighboring crops through pollen drift. Until then, all land grant institutions must prohibit the planting and handling of transgenic crops.
- ➡ That a third party safety protocol is established to prove that transgenic crops are safe to consume for livestock and humans and there will be no environmental damage caused by its growing.
