

PETITION TO SUPPORT FOOD AGENDA 2000-2010

By signing the petition below, I call on elected officials, political candidates, and regulatory agencies to pursue the following three public policies:

1. Global Moratorium on Genetically Engineered Foods And Crops

Moratorium on all genetically engineered foods & crops unless adequate safety-testing proves they are safe for human health & the environment. The FDA should respond to the legal petition (docket #00P-1211/CP1) filed 3/21/00 & require all GE foods to be labeled and safety-tested.

2. Convert US Agriculture to at least 30% Organic by 2010

Begin the phase-out of industrial agriculture by banning the most dangerous pesticides as well as hormone implants, antibiotics, and rendered animal protein in animal feed. Ban corporate feedlots and intensive confinement of farm animals.

3. Stop Factory Farming and Phase-Out Industrial Agriculture

Implement a long-term "transition to organic" program to shift agricultural production in the US from chemical-intensive, industrial farming to at least 30% organic by the year 2010.
