West Bridgewater, MA 12379

Dear Ross McLaren,

I am learning about genetically engineered foods and I am concerned about their effects on our health, family farms, and environment. I want to see genetically engineered foods removed from our supermarket shelves and urge you to take immediate steps toward this end. To renew my confidence in your stores, you can start by making all products bearing the Shaws label free of genetically engineered ingredients, as almost all major supermarkets in Europe have already done.

Sincerely,

---
