

Regenerating International Health and Democracy

Regeneration Health International

OCA, Regeneration International, and a group of our allies in the food and natural health movement are organizing a new international network called Regeneration Health International (RHI). The founders of RHI, which includes the editors of Organic Bytes, are team of scientists, farmers, activists, artists, physicians, and lawyers. The goal of RHI is to facilitate and catalyze a global movement and alliance dedicated to regenerating personal and public health. RHI work is based on the fundamental principles that food is medicine, and that human health, mental, physical and spiritual, are directly related to societal, environmental, and planetary health.

Food Is Medicine

The Aspen Institute reports:

“The United States faces an unabating chronic disease epidemic, leading to skyrocketing health care costs and devastating effects for individuals, communities, and the nation. The connection between chronic disease and nutrition is undeniable; nutrition not only plays a role in the onset of disease but also its prevention, management, and treatment. Efforts that involve a health care response to the need for better nutrition fall under the umbrella term ‘Food Is Medicine.’ An emerging body of research demonstrates the enormous promise of Food Is Medicine interventions across a range of health conditions in improving health and quality of life, while also curbing health care costs.”

New Documents Reveal Cover Up of the Wuhan Lab Leak by Fauci and the Pentagon

Republic Broadcasting.org reports: “Military documents state that EcoHealth Alliance approached DARPA in March 2018 seeking funding to conduct gain of function research of bat borne coronaviruses. The proposal, named Project Defuse, was rejected by DARPA over safety concerns and the notion that it violates the gain of function research moratorium.

“The main report regarding the EcoHealth Alliance proposal leaked on the internet a couple of months ago, it has remained unverified until now. Project Veritas has obtained a separate report to the Inspector General of the Department of Defense, written by U.S. Marine Corp Major, Joseph Murphy, a former DARPA Fellow...”

Good News: Naturally Acquired Immunity to COVID Is Powerful and Long-Lasting

Alex Berenson reports:

“A new report in the Journal of the American Medical Association finds more good news for unvaccinated people who have already had and recovered from COVID. Anti-spike protein antibodies following COVID infection and recovery seem to persist indefinitely in unvaccinated people, researchers found. People tested 20 months after coronavirus infection had slightly higher levels of antibodies on average than those just after infection... In contrast, spike protein antibodies in uninfected people who have received mRNA vaccines are known to decline at a rate of up to 40 percent a month.”

Chemical Used to Replace BPA in Plastics and Food Packaging Linked to Increased Risk of Cardiovascular Disease

The Defender Reports:

“Bisphenol-S (BPS), a replacement chemical for bisphenol-A (BPA), may increase the risk of cardiovascular disease in the U.S. population, according to a new study published earlier this month in Environmental Sciences Europe.

“A near-ubiquitous ingredient in plastic products, BPA is increasingly replaced by cousin chemicals — such as Bisphenol F (BPF) or BPS — due to mounting health concerns. However, scientists are now uncovering that these replacement chemicals may be as harmful as BPA.”

Sign the Petition to Ban the Weaponization of Viruses and Pathogens

OCA’s Ban “Gain-of-Function” (GOF) campaign comes in the wake of mounting, now overwhelming, evidence that the COVID-19 pandemic arose out of a joint U.S.-China collaboration in Wuhan, China to “soup up” SARS bat coronaviruses, resulting in a catastrophic accident that has triggered the death of millions and detonated a multi-trillion-dollar meltdown of the global economy.

OCA and our allies have begun to build a U.S. and international coalition to ban all GOF experiments and rewrite global treaties such as the 1972 Biological Weapons Convention to prevent any and all PPPs (Potential Pandemic Pathogens) from being collected and engineered in labs, whether civilian or military.

Take Action: Sign the Ban GOF Petition: <https://orgcns.org/swp>
