

Beyond the Nightmare

The Power of Protest

“We are seeing local governments and universities in the U.S. gradually stepping back. No new cities have joined the brigade for vaccine passports and Denver, CO, is stopping theirs. Poor suffering New York City, assaulted by a new segregation mandate, is reeling from the mandates, and surely a rethinking is coming. How many states now wish they had taken the path of Florida, which is experiencing a remarkable economic boom? “It’s beginning to feel like a long-overdue crumbling.”

Regenerating Food, Farming, and Health

Karen Howard reports from the 2022 Organic and Natural Health Association conference in Ft. Meyers, Florida:

“Breathing our Solutions... The world needs all of us to act from a place of intention. The fact that regenerative practices are becoming mainstream is a victory. However, our objective to ensure diet and supplementation as a cornerstone of the health care system remains an uphill battle.

“Doctors across the country are quietly treating patients successfully with simple, inexpensive medications. These are doctors who fully appreciate the importance of nutritional supplementation, including vitamin D. Their work is being labeled as myth and deception. I am reminded about the FDA’s response to our vitamin D petition relating to pre-term births, and their assertion that “there is no room for logic in science.”

Slow Boil

At the present time most of the body politic are still behaving like sheep, slow-boiled, gradually but cumulatively, in the bio-medical authoritarian state. But more and more are waking up and starting to resist. Todd Hayden writes in the Off-Guardian:

“They [i.e. most of the sheep] are tired of COVID – tired of being afraid of it, tired of lockdowns, of restrictions, of inconvenience. They are not awake to the bigger picture... In order to be fully awake, a sheep or a shrew [a COVID dissident] has to believe in some rather radical things.”

The Great Green Wall in Africa

Charles Eisenstein Reports:

“The Great Green Wall is a reforestation, land healing, peace, water restoration, and anti-poverty project spanning the entire African continent, from Senegal in the west to Eritrea nearly 5000 miles to the east. Originally conceived as a way to contain the growth of the Sahara Desert, it is not simply a wall of trees but a complex mosaic of indigenous land use techniques for restoring life and livelihoods across the Sahel...”

Blackrock, the World Economic Forum and the Great Reset

F. William Engdahl writes: “A virtually unregulated investment firm today exercises more political and financial influence than the Federal Reserve and most governments on this planet.

“The firm, BlackRock Inc., the world’s largest asset manager, invests a staggering \$9 trillion in client funds worldwide, a sum more than double the annual GDP of the Federal Republic of Germany.

“This colossus sits atop the pyramid of world corporate ownership, including in China most recently. Since 1988 the company has put itself in a position to de facto control the Federal Reserve, most Wall Street mega-banks, including Goldman Sachs, the Davos World Economic Forum Great Reset, the Biden Administration and, if left unchecked, the economic future of our world. BlackRock is the epitome of what Mussolini called Corporatism, where an unelected corporate elite dictates top down to the population...”

Fast Fashion 101: Everything You Need to Know

Lydia Noyes of Eco-Watch reports:

“Fast fashion” refers to mass-produced clothing that’s made quickly, cheaply, and in trending styles. The goal of fast fashion marketers is to get runway styles into shoppers’ hands as quickly as possible, no matter the quality or external costs.

“These trendy pieces tend to be of poor quality, and most won’t last more than a few wash cycles.”

Why is Fast Fashion bad? As Noyes points out it (1) It increases carbon emissions; (2) Overproduces toxic textiles; (3) Pollutes water systems; (4) Harms animals; and (5) Exploits workers.

A Short History of Lab Leaks and Gain-of-Function Studies

Professor Paul Goddard writes in GM Watch:

“Two myths have hindered investigations into the origins of the SARS-CoV-2 virus: one, that viruses seldom escape from laboratories; and two, that most pandemics are zoonotic, caused by a natural spillover of a virus from animals to humans... But a brief look at the history of lab leaks and the origins of pandemics confirms that their [Fauci, the CDC, The Who, the Chinese government, and others] claims are highly misleading. Research shows that the escape of viruses from laboratories and supposedly contained experiments, such as vaccine research and programs, is a common occurrence. In addition, many pandemics have arisen from lab escapes and almost all have not been directly zoonotic.”
