

## Stop the Madness

### Biolabs in your Backyard

There are 14 biosafety level 4 (BSL-4) labs in the United States. If you count biosafety level 3 (BSL-3) labs, there are more than 200! And, that's from a USA Today investigation back in 2015! Even more high-containment labs are operating now.

Is there one in your backyard?

### Monsanto's Poison in Our Daily Bread

The Detox Project reports: "The results of the most comprehensive glyphosate testing of food products ever conducted in the U.S. were released by The Detox Project on Tuesday, in a detailed report that shows the true levels of weedkiller contamination in essential foods sold by some of the top grocery stores in the country.

"The world's most used weedkiller, glyphosate, was discovered in a wide range of essential food products including bread, pulses and grains from top grocery stores such as Hy-Vee, Whole Foods Market, Amazon, Walmart and Target.

"Glyphosate, the active ingredient in the weedkiller Roundup, is a probable human carcinogen according to WHO's International Agency for Research on Cancer (IARC) and has led to the manufacturers of Roundup, Bayer/Monsanto, being forced to pay over \$10 Billion in damages to gardeners, groundskeepers and farmers who are suffering with blood cancer (non-Hodgkin's lymphoma)."

### How Coconut Oil Can Benefit Our Health

Dr. Mercola writes: "Despite the fact that more than 2,000 studies have been performed on coconut oil, demonstrating a wide range of benefits, it continues to be wrongfully vilified to this day, mainly because 90% of its fat content is saturated fat. However, saturated fats, and most particularly coconut oil, are an important part of the human diet. If you have bought into the media hype that saturated fats are unhealthy and will raise your risk of heart disease, it may be time to reconsider your position. "Coconut products, particularly coconut oil, have been used by certain populations around the world for millennia, and in places where coconut oil is consumed as part of the standard diet, people seem to thrive..."

### The Case for Regeneration: It Has Never Been More Urgent

The time for change is now, and it will take all of our global efforts to embrace frameworks that lead us to being better managers of our environments as well as help us pick on best practices, mobilize and address the root causes of the problems we are facing.

### More Evidence That COVID Came Out of a Lab

The U.K. Daily Mail reports:

"... scientists find [SARS-CoV-2] virus contains tiny chunk of DNA that matches sequence patented by Moderna THREE YEARS before pandemic began... Fresh suspicion that COVID may have been tinkered with in a lab emerged today after scientists found genetic material owned by Moderna in the virus's spike protein. They identified a tiny snippet of code that is identical to part of a gene patented by the vaccine maker three years before the pandemic.

"The international team of researchers suggest the virus may have mutated to have a furin cleavage site during experiments on human cells in a lab. They claim there is a one-in-three-trillion chance Moderna's sequence randomly appeared through natural evolution."

### Review of 400 Studies Show Lockdowns Failed

Mercola.com reports:

"Scientists the world over have done a deep dive into the unprecedented lockdowns and injection mandates that characterized the COVID-19 pandemic response. Over and over again, the results confirm what many instinctively knew all along — that these totalitarian schemes didn't work and may have caused more harm than good.

Despite the writing on the wall, health officials and academics continue to defend the Draconian measures. It's difficult to admit wrongdoing, especially of this magnitude, but sooner or later it will become widely known that, as Jeffrey Tucker, founder and president of the Brownstone Institute, put it, "these interventions turned a manageable pandemic into a catastrophe."

### Pfizer and Moderna Investors Worried

The Desert Review newspaper in California reports that Moderna stocks have lost 70% of their peak value and that Wall Street insiders are dumping their Pfizer stocks as well, anticipating mass lawsuits over vaccine injuries and deaths.

Justus Hope writes:

"Influential Wall Street analyst Edward Dowd 'predicts Moderna will drop to zero with bankruptcy as fraud related to concealing the COVID vaccine dangers surfaces, and he predicts Pfizer will become a sub-ten-dollar stock. Dowd explains that the smart money has already left Moderna and will soon be exiting Pfizer. Dowd foresees an avalanche of lawsuits coming as the insurance industry continues to uncover the legions of mounting deaths coming from the complications of the mRNA COVID-19 vaccines.'"
