

Regeneration and Planting Peace

Biolabs and Genetically Engineered Pathogens in Your Backyard? Take Action

Did you know that genetic engineering isn't used just in food and agriculture, but also to weaponize pathogens and create biological weapons?

It's not surprising when you learn what Monsanto was doing before it came up with its first GMOs for food production.

Monsanto was working as a military contractor. It made Agent Orange for the Vietnam War and refined plutonium for the Manhattan Project.

Monsanto also participated in tests to study the dispersal of biological weapons—tests that were conducted without notice or consent on the people of St. Louis, Missouri, in the 1950s and 60s. If you're just as concerned about GMOs used for biological weapons as you are about GMOs in food and agriculture, please sign the petition to stop the genetic engineering of dangerous pathogens.

Nutrition Illiteracy and the U.S. Food Crisis

The crucial importance of organic and healthy food is still ignored by most doctors and policy makers, while government subsidies for chemical-intensive and GMO corporate agribusiness commodities and processed junk food continue. Children become addicted to sugar-laden, bad-fat, and hi-carb foods at an early age. Food served up in schools, institutional cafeterias, and most restaurants is atrocious. Sixty percent of American food consumption is highly processed, contaminated with pesticides, drugs, chemical additives, and antibiotic residues, devoid of nutrition, vitamins, and essential trace minerals. Medical illiteracy and malpractice exacerbate America's food crisis.

Microplastics in Our Bodies

Even as committed organic consumers, we must avoid food and beverages packaged in plastic, both at home and in restaurants. For the first time, lab scientists have been able to detect alarming levels of microplastics in human blood.

Deconstructing the Corona Narrative

Ernst Wolf writes: "Officially, this is about the most serious health crisis in living memory, but the measures being used against this have not improved the situation but continuously made things worse. Every doctor today can confirm the health condition of people, the majority of people, is worse than before the crisis, and even from the point of view of those who ordered the measures we are faced with a shamble."

The Post-COVID Crisis in Education

Robert Malone reports: "Healthy children who contract Covid-19 have almost zero chance of death. Severe Covid-19 and children do not usually live in the same universe. However, as outlined in [a recent] UNESCO, UNICEF and World Bank Report, kids are the ones that have suffered the most from the consequences of the world-wide public policies. The school closures, lock-downs, and masking have resulted in unprecedented damage to our children..."

Message from the Global COVID Summit 2022

"Knowledge is our first line of defense."

"We, the people of the world, are enforcing Article 6, Section 3 of the Nuremberg Code which states that: In no case should a collective community agreement or the consent of a community leader or other authority substitute for an individual's informed consent."

Regenerative Organic Cannabis

Sun-grown, legacy cannabis farmers are struggling to survive and we need to do more.

Last year, Sun+Earth grew to 60 certifications, with 26 new farms and 3 new manufacturers. Sun+Earth now has certified partners in four states: California, Michigan, Oregon, and Washington.

Sun+Earth farms, brands, and retail outlets bring consumers regenerative organic cannabis, grown under the sun, in the soil of Mother Earth, without chemicals, by fairly-paid farmers.

Monsanto Seeks "Emergency Delay" After St. Louis Judge Allows Live Video of Trial

Carey Gillam writes: "Monsanto on Thursday asked a St. Louis judge to delay the start of a trial over claims brought by three men alleging exposure to Monsanto's glyphosate-based herbicides, such as the popular Roundup brand, caused them to develop non-Hodgkin lymphoma... The move by Monsanto comes after the judge in the case agreed to allow Courtroom View Network (CVN) to livestream the trial, starting on March 30."

Swedish Study Finds 5G Causes "Microwave Syndrome" in Humans

Towards Better Health Reports: "The first ever study of the health effects of 5G radiation on humans shows that 5G causes typical symptoms of microwave syndrome as well as a massive increase in microwave radiation. The case study also confirms once again that radiation well below levels allowed by the authorities causes ill health."
