The Food Crisis Needs an Organic Reset

OCA and Vandana Shiva on the "Food Crisis"

As my long-term India-based friend and political ally, Vandana Shiva points out, the 2022 global Food Crisis (the third in 15 years) is not primarily driven by food scarcity nor supply chain breakdowns.

The diabolical architects of the food crisis are the international bankers, food and grain hoarders, and financial speculators, aided and abetted by the Poison Cartel—i.e. the global economic elite making "killer" profits from toxic food and (manipulated) rising food prices, destroying public health (much to the benefit of their Big Pharma allies) and exacerbating U.S. and global poverty.

Where's the Beef: Ask Bill Gates?

Dr. Mercola writes:

"In a public statement about new emissions targets, the Dutch government admitted "The honest message ... is that not all farmers can continue their business." Those who do continue will have to come up with creative solutions to meet the new emissions restrictions."

At the same time, the Dutch government is preparing to radically restrict livestock farming and meat production — likely with Gates' blessing, if not due to his influence — Gates is gobbling up farmland back home.

Despite land prices being at a record-high, Gates purchased a 2,100-acre potato farm in North Dakota in June 2022, bringing the total land share held by the Gates' Red River Trust above 270,000 acres.

Paving a Digital Road to Hell

Suzanne Burdick of Children's Health Defense writes:

"The authors of a new report on digital identity systems warned 'the actual and potential' human rights violations arising from the digital ID model can be 'severe and potentially irreversible.'

The 100-page report — "Paving the Road to Hell? A Primer on the Role of the World Bank and Global Networks in Promoting Digital ID" — published by New York University's (NYU) Center for Human Rights and Global Justice urged human rights organizations to heed the threats posed by a global push for digital IDs.

Digital ID systems that frequently collect biometric data — such as fingerprints, iris or other facial feature recognition — are being adopted to replace or complement non-digital government identification systems."

Food, Dispossession and Dependency. Resisting the New World Order

Colin Todhunter writes:

"We are currently seeing an acceleration of the corporate consolidation of the entire global agri-food chain. The high-tech/big data conglomerates, including Amazon, Microsoft, Facebook and Google, have joined traditional agribusiness giants, such as Corteva, Bayer, Cargill and Syngenta, in a quest to impose their model of food and agriculture on the world.

The Bill and Melinda Gates Foundation is also involved (documented in 'Gates to a Global Empire' by Navdanya International), whether through buying up huge tracts of farmland, promoting a much-heralded (but failed) 'green revolution' for Africa, pushing biosynthetic food and genetic engineering technologies or more generally facilitating the aims of the mega agri-food corporations."

Fauci, Top Biden Officials Subpoenaed in Lawsuit Alleging They Colluded With Social Media to Suppress Free Speech

Megan Redshaw reports:

"Top-ranking Biden administration officials — including Dr. Anthony Fauci — and five social media giants have 30 days to respond to subpoenas and discovery requests in a lawsuit alleging the government colluded with social media companies to suppress freedom of speech 'under the guise of combatting misinformation.'

Missouri Attorney General Eric Schmitt and Louisiana Attorney General Jeff Landry on Wednesday served third-party subpoenas on Twitter, Meta (Facebook's parent company), Youtube, Instagram and LinkedIn."

Monkeypox or Moneypox?

Robert Malone writes:

"In a move that is sure to trigger widespread discussion concerning the independence, objectivity and wisdom of granting authority to the WHO to manage global infectious diseases responses, the monkeypox outbreak has been declared a Public Health Emergency of International Concern (PHEIC) by the World Health Organization. The declaration was made unilaterally, in direct contradiction of independent review panel advice, by WHO director Tedros Adhanom Ghebreyesus. Tedros made the declaration despite a lack of consensus among members of the WHO's emergency committee on the monkeypox outbreak, and in so doing overruled his own review panel, who had voted 9 against, 6 for declaring the PHEIC."
