

## **New Morning 2022?**

### **Amnesty for the COVID-19 Crimes & Criminals?**

*The Atlantic* magazine, a faithful propaganda outlet for the Establishment narrative on the COVID-19 pandemic, recently published a widely-read article, “Let’s Declare a Pandemic Amnesty,” admitting that the pandemic powers that be (government, indentured scientists, Big Pharma, and the mass media) got it all wrong on the origins, nature, treatment, and prevention of COVID-19, and that it’s time to move on.

The author of the article, Brown University professor Emily Oster, as Charles Eisenstein points out, “proposes that we forgive and forget the crimes against the public perpetrated during the COVID years. Her main argument seems to be that they weren’t really crimes, they were just the result of ignorance...Honest mistakes should not be punished.”

### **Is This the End of Credibility for the “USDA Organic” Label?**

Longtime Minnesota organic farmer and national leader Jim Riddle writes:

“The fundamental concepts of organic farming have always been, ‘Feed the Soil, not the Plant,’ and ‘Healthy Soil leads to Healthy Crops, Healthy Animals, Healthy People, and a Healthy Planet.’ Now, those concepts have been turned on their head, with a recent Appeals Court ruling that you don’t even need soil for growing terrestrial crops, in order to be certified organic in the United States.

Will the 9th Circuit Court’s September 2022 ruling, which stated, ‘no part of the statute [the 1990 Organic Foods Production Act] clearly precludes organic certification of crops grown hydroponically,’ mean the end of organic farming, as we know it? Maybe. Maybe not.”

### **On Central Bank Digital Currencies: Oh Sh\*t Its Really Happening.**

The International Monetary Fund, the World Economic Forum, Establishment politicians, and the private sector are working overtime planning our future, including how they can take control over our money, purchasing decisions, savings, and behavior, using a Chinese-style Central Bank Digital Currency (CBDC).

Under CBDC we won’t need cash any longer, it will be oh so convenient and energy efficient. In addition, we’ll be constantly monitored so that we are protected from “disinformation,” and encouraged, or actually forced, to behave in a manner that benefits the environment, the economy, and the common interest, or so say the technocrats and powerful CBDC proponents such as Bill Gates and Klaus Schwab.

### **Nutrition: Why We Can’t Trust the Government**

OCA’s ally, The Alliance for Natural Health, writes:

“The Academy of Nutrition and Dietetics (AND) and its foundation ‘assist the food and beverage, pharmaceuticals and agribusiness industries through their large network of professionals and students, their lax internal policies on corporate partnerships and their topical position papers.’ These are the scathing conclusions of a new investigative report into the AND’s operations. It tells a crony story that many of us know all too well: the ‘experts’ who wield considerable power and influence over national food policies are beholden to the junk food companies driving the chronic disease epidemic. It is another reason why we should not listen to the food advice dispensed by the AND and the federal government.”

### **How to Ensure That Carbon Credits Are Not Just Greenwashing**

Organic and regenerative farmers, as we never tire of repeating, are the true stewards of the land and practitioners of animal husbandry. They are leading the organic movement to the next stage, Organic 3.0, regenerating soils and ecosystems; preserving and improving biodiversity; sequestering carbon above ground and below ground; producing healthy, nutrient-dense foods; expanding the market for organic and regenerative foods and products; and revitalizing rural communities and livelihoods.

According to ORIC:

“With recent questions over the legitimacy of the Australian carbon offset scheme, it’s never been more important that carbon emissions are offset with legitimate credits and are free of greenwashing.

But the recently-released Eco-Credit by ORICoop is addressing many of these key issues in the current carbon offset market.”

### **Biden’s “Useable Nukes”: A Fast Track to the Apocalypse**

Mike Whitney reports for Global Research:

“The Biden administration’s Nuclear Posture Review is, at heart, a terrifying document. It not only keeps the world on a path of increasing nuclear risk, in many ways it increases that risk. Citing rising threats from Russia and China, it argues that the only viable U.S. response is to rebuild the entire U.S. nuclear arsenal, maintain an array of dangerous Cold War-era nuclear policies, and threaten the first use of nuclear weapons in a variety of scenarios.”
