

BAY AREA CONSUMER WARNING

Are You Eating Food Fertilized with Toxic Sewage Sludge ?

Tell the Mayor and City Officials to Stop Spreading Sewage Sludge Under the Guise of *Organic Fertilizer*

Toxic sludge is good for you?

San Francisco Mayor Gavin Newsom and the San Francisco Public Utilities Commission, along with municipal governments across the US, want farmers, school, and backyard gardeners to grow their veggies using toxic sludge, spreading the outrageous lie that municipal wastewater sewage plants can somehow magically transform hazardous materials into "organic fertilizer."

Toxic sludge is poison.

Scientific evidence has confirmed that municipal sewage sludge contains hundreds of dangerous pathogens, toxic heavy metals, flame-retardants, endocrine disruptors, carcinogens, pharmaceutical drugs and other hazardous chemicals coming from residential drains, storm water runoff, hospitals, and industrial plants.

Sewage sludge contains everything the sewage treatment plant was able to remove from the sewage—plus every new chemical and pathogen formed in the mad synergy of this chemical soup, including virulent, antibiotic-resistant bacteria created through horizontal gene transfer.

San Francisco public officials have helped the toxic sludge industry score a major victory in the Bay Area, where they've been able to convince hundreds of regional (non-organic) farmers to spread the hazardous material on farm land and pasture, and have actually been able to get city residents to take hundreds of thousands of pounds of toxic sludge and spread it over their backyard and community gardens.

San Francisco is a strategic battleground to stop the sludge industry from poisoning more farms and communities. In 1998 the organic community rose up and banned the use of sewage sludge in organic farming. Now it's time to ban it's use on farms, gardens, lawns, and land in general.

Sewage sludge is a form of hazardous waste and needs to be contained and isolated as such.

Turn this leaflet over for grassroots action guidelines.

California proposition 65 (P65) requires the listing of chemicals known to cause cancer or reproductive toxicity. Chemicals known to the SFPUC that are in San Francisco sewage sludge that are also found on the California P65 list include:

MERCURY · MOLYBDENUM · COBALT · ANTIMONY
CHROMIUM · DIBENZOFURANS · NAPHTHALENE
1,2-DIBROMO-3-CHLOROPROPANE (DBCP)
DI (2-ETHYLHEXYL) PHTHALATE (DEHP)
TCDD EQUIVALENTS (DIOXINS) SUCH AS
OCTACHLORODIBENZO-P-DIOXINS (OCDD)

STOP SLUDGE!

SIGN OUR PETITION!

Please visit our Sludge Campaign webpage and follow the link to sign the petition to Mayor Newsom:
