

Ban Monsanto/Bayer's Cancer-Causing Glyphosate-Based Roundup Weedkiller!

It's time to replace glyphosate-based weedkillers with safe, organic alternatives.

In 2015, the World Health Organization's International Agency for Research on Cancer reviewed the science on glyphosate-based herbicides and determined that they are probable human carcinogens. Since then, there has been even more evidence of their human health and environmental harms. Yet outside California, glyphosate-based herbicides don't even carry warning labels.

The ethical and responsible thing is to stop selling, buying and using glyphosate!
