COVID-19 is a genetically engineered virus that originated from a lab, not nature. We still don’t know who patient zero was or how they got infected, but the virus itself bears the marks of the biological weapons research Anthony Fauci funded, euphemistically called “gain-of-function” research. Fauci partnered with the Pentagon to approve experiments to breed pandemic superbugs in poorly regulated labs in Wuhan, China, and elsewhere, under conditions that almost certainly guaranteed the escape of weaponized microbes like SARS-CoV-2.

Suppression of Lifesaving Treatments

Doctors treating COVID patients found that antiviral medications, including hydroxychloroquine and ivermectin, worked. Fauci suppressed the scientific evidence of these safe, cheap, off-patent drugs’ effectiveness. Instead of using these early, out-patient treatments, doctors were advised to keep patients out of the hospital until they needed ventilators, an intervention that proved deadly for most. The U.S. has 4.2 percent of the world’s population and 14.5 percent of COVID deaths. Fauci’s record is the worst in the world, but it served his purposes. By increasing the death count and suppressing available treatments, he made vaccine mandates possible.

Lockdowns & Mandates

Fauci’s lockdowns didn’t stop the spread of the virus or lower the COVID death count, but they did shutter small businesses and put millions of people out of work, causing a massive transfer of wealth from working people to tech billionaires. Likewise, his vaccines have proven ineffective at preventing COVID transmission, hospitalization or death, but are making Pfizer, Moderna, Johnson & Johnson and their shareholders record profits. An appellate court recently blocked Fauci’s vaccine mandates, acknowledging that irreparable harm would result if reluctant individuals were forced to be jabbed to keep their jobs.
Cruel Experiments on Children & Animals

“Gain-of-function” biological weapons research isn’t the only example of Fauci’s mad science. The disregard for life evident in his COVID work extends to everything he’s touched at the National Institutes of Allergy and Infectious Diseases. Fauci funded studies where beagles were eaten alive by sandflies, their vocal cords cut to spare scientists the sounds of their suffering. It’s hard to imagine anything worse than Beaglegate, but Fauci’s didn’t stop at experimenting on puppies. As the shocking BBC documentary Guinea Pig Kids revealed, he conducted illegal drug trials on babies and children, specifically Black and Hispanic orphans and foster children. When the drugs, trialed by Merck, Bristol-Myers Squibb, Glaxo Wellcome and Pfizer, caused debilitating side effects and the children refused to take their medicine, the investigators installed feeding tubes in their bellies to administer the drugs by force. When the foster parents refused to administer the experimental drugs, the children were removed from their care.

Pharma Profits Not Public Health

What could possibly motivate someone to engage in such criminal behavior? Power? Money? Fauci certainly has both. He is the highest-paid employee in the U.S. government and 68% of his $437,000 a year salary comes from bioweapons research. Over the course of his career, Fauci has distributed $930 billion in research grants through the NIAID. Fauci makes more money than the president and controls more money than a billionaire.

That’s the Real Anthony Fauci
